#### **EXAMINER'S AMENDMENT**

**Claims 7, 14, 16, and 18 are allowed.**

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on 12/30/2011, Attorney Zareefa Flener requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. DA 120400 the required fee of \$710.00 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Applicant paid for two months and a third month is necessary to make this amendment. The fee for three months is \$1270. The fee for two months is \$560. Therefore \$710 is still owed.

The application has been amended as follows:

The Title has been changed to "Method of Recovering a Base Paper for Gypsum Board"

Claims 11, 15, 17, and 19 have been canceled.

Claim 7 has been replaced by the following:

A method to recover a base paper for gypsum board from a waste material of gypsum board comprising a gypsum core and the base paper for gypsum board adhering thereto, comprising the steps of:

breaking the waste material of gypsum board,

separating a gypsum component and a paper piece of the base paper for gypsum board from the broken waste material of gypsum board thereby forming a separated paper piece, and

washing the separated paper piece with water in a rotary drum-type washing device so as to eliminate a gypsum component adhering to the separated paper piece from the separated paper piece, and further comprising a step of

previously adding the separated paper piece into a portion of washing water before the separated paper piece is introduced to the rotary drum-type washing device, and

after water washing, dewatering the separated paper piece wherein the step of dewatering the paper piece comprises squeezing and dewatering of the separated paper piece by one of a roller, a centrifugal machine, and a squeezing machine,

wherein the rotary drum-type washing device comprises a separated paper piece inlet at one end of rotatably lying air and water through-flow drum and a separated paper piece outlet at the other end thereof and is capable of supplying washing water to a separated paper piece in the air and water through-flow drum.

2. The following is an examiner's statement of reasons for allowance: It is known to separate base paper from gypsum board as taught in the closest prior art SATORU (JP6142638). SATORU failed to teach washing the paper in a flow-through washing drum. While KAMO (both JP8176985 and US 6,470,898) discloses the use of flow-through washing drums it washes pulp while the instant invention washes 'separated paper pieces'. Pulp is a water suspension of individual fibers and fiber bundles. In contrast 'separated paper pieces' describe fibers bonded together in a paper making process to form a paper sheet which has then subsequently torn/cut/shredded into smaller sections of paper which have not further been broken down into individual fibers and fiber bundles. The process of washing paper pieces is not analogous to washing a pulp. Additionally, the person of ordinary skill in the art would not look to washing paper pieces as compared to washing a pulp suspension. The person of ordinary skill in the art would expect better washing of a pulp suspension than paper pieces (better diffusion of water through a pulp bed as compared to bonded fibers in a paper piece).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

Art Unit: 1741

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
